

Digital Signs for Your School

Digital signage allows plasma screens, televisions, and computer monitors to take the place of posters. Unlike a poster, the display can change as often as desired—even several times a minute—and can include video and audio content. As a result, the same screen can be used to display a schedule of cocurricular events, play a video of a presentation, and broadcast the morning announcements.

StrandVision LLC provides a service through which content for digital signs can be created online through a Web browser. The signs can then be uploaded to multiple screens in a building or a district.

Each screen can display different content if desired, such as menus in the cafeteria and staff development announcements in the teachers' break room. The content can also be made to vary depending on the time of day. For more information, please visit www.strandvision.com/?schools.
